Restriction/Election

1. This application is a Continuation of PCT/US99/12799. For applications filed under 371, PCT rules for lack of unity apply. The prior art anticipates the instant claims drawn to an oligonucleotide as indicated by Nazarenko et al. (USPN. 5,866,336) and hence the instant claims lack special technical feature. Hence the Restriction requirement for the instant claims is proper.
2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-25, drawn to an oligonucleotide and a kit comprising the said oligonucleotide.

Group II, claim(s) 26-74, drawn to a method determining or detecting a target nucleic acid sequence.

The inventions I - II do not meet the requirements for unity of the invention because the inventions do not share the special technical feature, which defines a contribution to which each of the inventions makes over the prior art.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
